

IT & Software Development

Experienced

Senior Software Designer

40 tuntia - Oulu, Finland

We are looking for 1-2 experienced Senior Software Designers to join our team in Oulu. In this role, you will work on ERP system development tasks, handle support requests with your team and participate in weekly meetings as part of a larger international team, discussing system development, customer needs, and new support requests that may involve implementing new functionalities. You have experience designing and implementing large-scale software solutions and a strong understanding of industrial order-to-delivery processes. You have SQL database skills working with technologies such as Delphi, C#, ASP.NET, or Visual Studio. You thrive in customer interactions, possess excellent communication skills, and genuinely desire to take responsibility and support your team.

Mitä sinä teet

- Developing the ERP system, focusing on large and complex projects
- Guiding and supporting team members
- Customer collaboration and communication
- Front-end and back-end development
- Investigating customer support requests and solving complex problems

Mitä me etsimme

- Relevant technical education (e.g., IT specialist, business IT, or engineering degree)
- Strong database expertise (Oracle PL/SQL or another SQL-based solution)
- Proficiency in a front-end development language (e.g., Delphi, C#.NET)
- Customer-oriented, self-driven, and eager to learn
- Solution-oriented and development-focused mindset
- Problem-solving skills and strong teamwork abilities
- Fluent English skills (Finnish is a plus)

Mitä me tarjoamme

- Long-term career opportunities, allowing you to shape your career based on your interests and expertise
- Exciting global projects
- A workplace where you can grow, supported by an experienced team
- A supportive work community where you quickly become part of the team
- Flexible hybrid work model after the onboarding period
- Modern office in the center of Oulu
- Attractive employee benefits
