

Experienced

Senior Engineer Mirror Assembly

Gujarat, India

As a Senior Production Engineer with over a decade in the automobile industry, specialise in manufacturing process optimization, quality control, and lean production. Proven expertise in improving efficiency, reducing downtime, and leading cross-functional teams to achieve production targets. Committed to delivering high-quality results and driving continuous improvement in automotive manufacturing.

What you'll do

- As a Senior Production Engineer in the automobile industry, Responsible for overseeing and improving manufacturing processes to ensure efficient, high-quality production. My tasks include planning daily production activities, monitoring equipment performance, and implementing lean manufacturing techniques to reduce waste and increase productivity. I lead cross-functional teams, coordinate with design and quality departments, and ensure compliance with safety and industry standards. I also analyze production data, identify areas for improvement, and implement process enhancements. Additionally, I mentor junior engineers, support new product launches, and contribute to achieving overall production targets and operational excellence.

What we are looking for

- Dynamic and results-driven Production Engineer with 4–5 years of experience in the automobile industry, specializing in process optimization, quality assurance, and lean manufacturing. Proven track record in improving production efficiency, minimizing downtime, and ensuring adherence to safety and quality standards. Skilled in managing day-to-day operations, collaborating with cross-functional teams, and supporting new product development and launch activities. Adept at analyzing production data to drive continuous improvement and operational excellence. Seeking a challenging role to further apply my technical expertise and contribute to the growth and success of a progressive automotive organization.
