

Experienced

Assistant Manager Quality

Gujarat, India

Profile Introduction (Assistant Manager – Quality):

Results-oriented quality professional with proven expertise in **quality assurance, process control, and continuous improvement** within the **plastic components manufacturing industry for the automobile sector**. Skilled in implementing and maintaining **ISO/TS 16949, IATF 16949, and ISO 9001 quality systems**, ensuring strict compliance with customer and regulatory standards. Experienced in **root cause analysis, corrective and preventive actions (CAPA), PPAP, APQP, FMEA, MSA, and SPC** to maintain consistent product quality and reliability.

Proficient in **vendor quality management, in-process inspection, and customer complaint resolution**, with a focus on reducing rework, scrap, and rejection rates. Adept at leading **cross-functional quality improvement initiatives** and collaborating with production, design, and supply chain teams to achieve organizational quality objectives. Recognized for a **strong analytical mindset, attention to detail, and hands-on leadership** in driving a culture of excellence and continuous improvement across the organization.

What you'll do

- **Task Description – Assistant Manager (Quality)**
 - Manage day-to-day quality operations including incoming, in-process, and final inspection to ensure product compliance with customer and industry standards.
 - Implement and monitor quality management systems (QMS) in line with IATF 16949, ISO 9001, and customer-specific requirements.
 - Lead activities related to APQP, PPAP, FMEA, MSA, and SPC to support new product development and continuous improvement initiatives.
 - Conduct root cause analysis (RCA) and implement corrective and preventive actions (CAPA) to address customer complaints and internal quality issues.
 - Coordinate with production, design, and supplier quality teams to resolve quality concerns and maintain consistent process performance.

What we are looking for

- **Profile Description – Assistant Manager (Quality):**

Dynamic quality professional with 4–5 years of experience in **quality assurance, process control, and continuous improvement** within the **plastic components manufacturing industry for the automobile sector**. Skilled in implementing and maintaining IATF 16949, ISO 9001, and customer-specific quality systems to ensure product and process excellence. Proficient in APQP, PPAP, FMEA, MSA, and SPC, with strong expertise in **root cause analysis, CAPA, and defect reduction**.

Experienced in **supplier quality management, in-process inspection, and customer complaint handling**, ensuring consistent compliance with OEM standards and regulatory requirements. Adept at leading **quality audits, documentation, and improvement initiatives** to enhance reliability, reduce rejection, and improve overall operational efficiency. Recognized for a **methodical approach, strong analytical skills, and hands-on leadership** in driving a culture of quality and continuous improvement across the organization.
