Experienced

# Senior Engineer

Noida, India

Motherson Technology Services Limited a next-generation global technology solutions company, was born for this pioneering era. Our company was founded in 2000 with the goal of assisting companies to expedite their digital and technological transformation processes. In fact, Motherson Technology Services uses a technology-agnostic approach to help our clients thrive in today's fast-changing and highly competitive world. The 21st century has been an era of colossal technological advances. These advancements have altered our lives so drastically that only one way forward is technology-led transformation.

## What you'll do

- Job Summary:

  We are seeking a highly skilled and experienced Salesforce professional with over 5 years of hands-on experience in Salesforce development and customization. The ideal candidate should be capable of working closely with business stakeholders to understand requirements and deliver scalable Salesforce solutions.Key Responsibilities:

  Design, develop, and implement customized solutions within the Salesforce platform using Apex, Visualforce, Lightning Web Components (LWC), and other Salesforce tools.

  Collaborate with cross-functional teams to gather requirements and translate them into technical solutions.

  Perform configuration, data migration, and integration of Salesforce with external systems (using REST/SOAP APIs, middleware tools).

  Maintain and enhance existing Salesforce orgs with best practices in mind.

  Participate in all phases of the software development lifecycle, including design, development, testing, and deployment.

  Provide post-implementation support and ongoing maintenance.

  Work in an Agile environment and contribute to continuous improvement practices.Required Skills & Qualifications:

  5+ years of hands-on experience in Salesforce development and customization.

  Strong knowledge of Apex, SOQL, SOSL, Visualforce, Lightning Web Components, LWC.

  Experience with Salesforce APIs and integrations (REST, SOAP, middleware like Mulesoft preferred).

  Strong understanding of Salesforce best practices, governor limits, and platform security.
