# Manager

Gujarat, India

## Profile Introduction – Quality Manager:

Strategic and results-driven **Quality Manager** with extensive experience in **quality assurance, process optimization, and continuous improvement** within the **plastic components manufacturing industry for the automobile sector**. Demonstrated expertise in developing, implementing, and sustaining **IATF 16949, ISO 9001**, and other automotive quality management systems to ensure full compliance with customer and regulatory requirements.

Proficient in leading **APQP, PPAP, FMEA, MSA, SPC**, and **problem-solving methodologies (8D, RCA, CAPA)** to enhance product reliability, process stability, and operational excellence. Skilled in **vendor quality management, customer quality assurance, and new product development quality planning**, with a proven track record of reducing defects, rework, and warranty claims.

Recognized for strong leadership in building and mentoring high-performing quality teams, driving **cross-functional collaboration**, and fostering a culture of quality, accountability, and continuous improvement. Adept at translating quality data into actionable insights to support strategic decisions and deliver superior customer satisfaction.

What you'll do

### • Task Description – Quality Manager

- Lead and oversee the entire quality management function, ensuring all products meet automotive industry standards, customer specifications, and regulatory requirements.
- Develop, implement, and sustain Quality Management Systems (QMS) in line with IATF 16949, ISO 9001, and OEM-specific standards to drive operational excellence and compliance.
- Direct and monitor incoming, in-process, and final inspection activities, ensuring robust process control and consistent product quality.
- Spearhead APQP, PPAP, FMEA, MSA, and SPC activities to support new product launches, process validation, and continuous improvement initiatives.
- Lead root cause analysis (RCA) and Corrective and Preventive Action (CAPA) processes for customer complaints, internal

What we are looking for

### • Profile Description – Quality Manager:

Accomplished and results-driven Quality Manager with extensive experience in **quality assurance, process optimization, and continuous improvement** within the **plastic components manufacturing industry for the automobile sector**. Demonstrated expertise in establishing, implementing, and maintaining **IATF 16949, ISO 9001**, and customer-specific quality systems to ensure consistent product quality, regulatory compliance, and customer satisfaction.

Proficient in leading **APQP, PPAP, FMEA, MSA, and SPC** activities for new product development and production stabilization, with proven ability to drive **root cause analysis (RCA)** and **corrective and preventive actions (CAPA)** that significantly reduce defects and improve process capability.

Experienced in **supplier quality management, customer quality assurance, and internal/external audits**, ensuring alignment with **OEM standards and global best practices**. Adept at leading **cross-**
