Experienced

Regional Commodity Manager

Marysville, USA

Overview: As a Regional Commodity Manager, your role is pivotal in overseeing the procurement and management of specific commodities within the designated region. You will be responsible for developing commodity strategies, ensuring compliance with quotation timelines, generating reports, and proficiently utilizing SAP Ariba for procurement activities.

Что вы будете делать

- Key Responsibilities:

Commodity Strategy Development:

- Develop and implement comprehensive commodity strategies aligned with organizational goals and regional requirements.
- Conduct thorough market analysis and assess supplier capabilities to optimize sourcing decisions.

- Collaborate with cross-functional teams to integrate commodity strategies into overall business plans.

Quotation Compliance and Management:

- Ensure timely issuance and management of quotations in accordance with procurement timelines and compliance standards.
- Monitor quotation processes to facilitate efficient supplier engagement and negotiation.
- Implement best practices for cost-saving initiatives and supplier relationship management.

- Identify the most sustainable source in agreement with Carbon net zero 2040 Motherson commitment, as well as to understand and respect the customers supply chain requirements such as Conflict mineral reporting (CMR), Modern Slavery, and Social Responsibility requirements

Reports and Analysis:

- Generate regular reports on commodity performance, procurement metrics, and cost savings.
- Analyze data to identify trends, opportunities, and areas for improvement.
- Present findings to senior management and stakeholders to drive informed decision-making.
- Provide input, with justification, with regard to forecast spend and Purchase Price Variance (PPV) data for the commodity under management.

Reports and Analysis:

- Generate regular reports on commodity performance, procurement metrics, and cost savings.

Кого мы ищем

- Qualifications and Skills:

- Bachelor's degree in Business Administration, Engineering, Supply Chain Management, or a related field (Master's preferred).

- Proven experience in commodity management, procurement, or supply chain roles, preferably in Automotive field.

- Strong understanding of strategic sourcing, contract negotiation, and supplier management principles.

- Proficiency in SAP and SAP Ariba or similar ERP and procurement software (preferred).

- Excellent analytical skills with the ability to interpret drawings, specifications, complex data and make data-driven decisions.

- Effective verbal and written English, interpersonal skills for building relationships and influencing stakeholders.

- Ability to thrive in a fast-paced environment and manage multiple priorities effectively.
